## **DETAILED ACTION**

1. Claims 14-18, 20-26, 29-37, 40, and 41 are pending and under consideration in this Office Action.

2. The rejection of claims 14-17 under 35 U.S.C. 103(a) as being unpatentable over Keilhauer et al. in view Reuter has been withdrawn in view of applicants' arguments filed 05/03/2007.

### ***Double Patenting***

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 14-18, 20-26, 29-37, 40, and 41 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-25 of U.S. Patent No. 6,177,264.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the claimed transformed microorganism and claimed methods for the

Art Unit: 1652

production of L-valine are obvious variations over the patent claims to the isolated polynucleotides from *Corynebacterium* encoding panB, panC, ilvD, and ilvBNCD and methods using microorganisms comprising said polynucleotides. Examples 1-8 of U.S. Patent No. 6,177,264 provide support for the patent claims and discloses cloning and expression of panB, panC, ilvD, ilvBN, ilvC, ilvD genes, construction of inactivated panC and ilvA mutantions, and culturing of *Corynebacterium* strains having these mutations. Furthermore, the enclosed alignment of SEQ ID NO: 1 of the instant application to SEQ ID NO: 4 of U.S. Patent No. 6,177,264 shows a 100% identity (see attached SEQ ID NO: 1 Alignment).

Therefore, the disclosure of U.S. Patent No. 6,177,264 supports claims 1-25 for the isolated polynucleotides from *Corynebacterium* encoding panB, panC, ilvD, and ilvBNCD. See MPEP 804, part II B. 1., citing *In re Vogel* 164 USPQ 619, 622 (CCPA 1970): "Further, those portions of the specification which provide support for the patent claims may also be examined and considered when addressing the issue of whether a claim in the application defines an obvious variation of an invention claimed in the patent".
